

Embedded Software Engineering

Domänenorientierte Entwicklung vom Embedded Systemen

Prof. Dr. Hugo Fierz
InES - Institut für Embedded Systems
hugo.fierz@zhaw.ch

Version 4.1

Inhalt

- 1 Embedded Systeme 1
 - 1.1 Der Zweck von Embedded Systemen 1
 - 1.2 Spezifische Merkmale und Anforderungen 3
 - 1.3 Embedded Systeme - Technische Ausprägungen 4
 - 1.4 Zwei Beispiele von Embedded Systemen 7
- 2 Domänenorientierte Software-Entwicklung - DESC Methode 9
 - 2.1 Embedded Software Engineering 9
 - 2.2 Embedded System Problemanalyse mit Problem Frames 11
 - 2.3 Separation of Concerns: Funktion, Verbindung, Scheduling 14
 - 2.4 Semantik der virtuellen Interaktion 18
 - 2.5 Domänenorientierte Software Architektur 20
 - 2.6 Der domänenorientierte Entwicklungsprozess 23
- 3 Modelling of Reactive Components with CIP 27
 - 3.1 Compositional Behavioural Models 27
 - 3.2 Architecture and Structure of CIP Models 34
 - 3.3 Processes – Extended Finite State Machines 36
 - 3.4 Message Passing Interaction – Communication 44
 - 3.5 Pulse Cast Interaction 51
 - 3.6 State Inspection Interaction 66
 - 3.7 Mode Control Interaction 75
 - 3.8 Modelling Sugar Supported by CIP Tool 83
- 4 Entwicklung reaktiver Modelle - DPC Methode 87
 - 4.1 Übereinstimmung von System- und Prozessverhalten 88
 - 4.2 Domänenorientierte Modellierung 95
 - 4.3 Modellierungsbeispiel: DoorControlSystem - DCS 102
 - 4.4 Verhaltensmuster 108
 - 4.5 Automatische Implementierung von CIP-Modellen 111
- 5 I/O-Verbindung reaktiver Komponenten - DEC Methode 119
 - 5.1 DEC Referenzmodelle 120
 - 5.2 Domänenorientierte Spezifikation der Verbindungssoftware 125
 - 5.3 Beispiel einer DEC-Spezifikation - SlidingGate 133
 - 5.4 Interaktionsfunktionen 136
 - 5.5 Codegenerierung mit dem DEC Tool 140
- 6 Hard Real-Time Scheduling - DRS Methode 141
 - 6.1 Zyklusbasierte Ausführung einer Embedded Unit 142
 - 6.2 Deadline-Scheduling der Ereignisverarbeitung 152
 - 6.3 RT-Scheduling periodischer und aperiodischer Tasks 157
 - 6.4 Rate Monotonic Scheduling 159
 - 6.5 Embedded Unit Controllers als Polling Server ausgeführt 164
 - 6.6 Schedulability Verification 170
